

The screenshot displays a patent search application window. The main area contains a list of patent entries, each starting with a classification code (e.g., S550, S551) followed by a description. The entries are sorted by relevance or date. The search results panel on the right shows the search criteria used: "Search" and "List" buttons, a "Browse" button, and a "Queue" button. The search criteria are "QB5" and "USPA1". The default operator is "OR", and the option "ight all hit terms initially" is checked. The search results list shows the first few results: "2, 53, 55, 57.1, 76, 146.4, 146.8". The bottom of the window features a navigation bar with icons for "Custom form", "BRS form", "IS&R form", and other functions.
